1. Executive summary

Veda Technology runs free, 100% virtual, level-wise internships for engineering and computer-application students, and also delivers web, app, cloud, data and digital marketing services to businesses. This report plans a complete 30-day organic campaign, **#BuildYourProof**, that grows online visibility, builds trust and generates two kinds of leads: internship applicants and service enquiries.

The central idea is simple: **Veda Technology's certificates prove output, not attendance.** The campaign turns that promise into visible proof - intern projects, mentor feedback, certificate verification and helpful content - spread mainly through LinkedIn and Instagram, with Facebook reaching local business owners.

Key recommendations

- Use intern advocacy as the main growth engine: every intern already posts on LinkedIn, so a shared hashtag (#VedaTechnologyIntern) and post template turn each submission into free brand reach.
- Lead with trust content (fake-internship red flags, certificate verification) because distrust of free internships is the audience's biggest barrier.
- Build one SEO landing page per internship track and per service, plus four value-first blog articles.
- Run two organic lead funnels: a free Fresher Project Kit for students and a free 10-Point Website Health Check for businesses.
- Measure everything with UTM links and a simple Google Sheets lead log; review KPIs weekly.

Realistic 30-day outcome (estimate, organic only): about 40,000+ combined reach, 600+ website visits from social and search, 40-60 internship applications, 100+ lead-magnet sign-ups and 6-10 business enquiries - with Rs 0 spent on ads.

2. Veda Technology at a glance

All information below comes from Veda Technology's public website. No services, certifications or partnerships beyond these are claimed anywhere in this campaign.

Area	Publicly available information
What it is	Provider of virtual internships, IT training and IT services (website: vedatechnology.in).
Internship model	Free to apply (no application fee), 100% virtual, generally 4-6 weeks, task-based and level-wise (Level 1, 2 and 3 tracks).
Internship tracks	Web Development, Data Science, Data Analytics, Python, Android, Java, Cloud Computing, Graphic Design and UI/UX (plus Digital Marketing, the track this project is part of).
Intern benefits	Official offer letter, personal Intern Dashboard, mentor review on submitted tasks, completion certificate with a unique verification ID, performance-based Letter of Recommendation.
Business services	Web Development, App Development, Cloud Computing, Data Science and Digital Marketing for clients.
Who it serves	B.Tech, BCA, MCA, M.Tech and diploma students and graduates; businesses needing IT work.
Trust signals	Registered under the MSME/Udyam framework; certificate verification ID.
Contact	support@vedatechnology.in | +91 9122052601 | Lakhisarai, Bihar, India.
Brand identity	Navy (#0B1E4D) and orange; positioning line: certificates that prove output, not attendance.

3. Audience analysis

Veda Technology serves two very different markets with one brand: **learners** (volume, word-of-mouth) and **businesses** (revenue). The campaign speaks to each with separate messages and channels.

Segment	Priority	Needs & motivations	Where they are online
Students (B.Tech/BCA/MCA/diploma, 18-22)	Primary - largest volume	Want a first internship and a credible certificate for their resume; afraid of fake or paid internships; need guidance on which skill to pick.	Instagram, YouTube Shorts, LinkedIn, college WhatsApp groups
Graduates & freshers (21-25)	Primary - highest intent	Job-hunting; need portfolio projects, an LOR and proof of practical skill to stand out to recruiters.	LinkedIn, Google Search, Naukri/Indeed, Telegram groups
Small & local businesses (owners 30-55)	Secondary - revenue	Need an affordable website, social presence and Google visibility; limited time and technical knowledge.	Facebook, Instagram, Google Search/Maps, WhatsApp
Startups & SMEs (founders/managers 25-45)	Secondary - revenue	Need app development, cloud setup or data/dashboard work delivered quickly by a reliable partner.	LinkedIn, Google Search
Influencers: college TPOs, faculty, parents	Supporting	Want safe, legitimate, free opportunities for students; care about verification and transparency.	LinkedIn, email, WhatsApp

Key insights

- Trust is the #1 barrier: students have seen many 'pay-to-intern' schemes, so verification IDs, MSME registration, mentor reviews and real intern work must appear in content constantly.
- Every intern already posts their work on LinkedIn as part of task submission - this is a free, built-in word-of-mouth engine that only needs a common hashtag and a template.
- Students consume short, visual, useful content (reels, carousels); businesses respond to plain-language problem/solution posts and free audits.
- Peak student intent windows: semester breaks (Dec-Jan, May-July) and placement season; business intent rises before festive and new-financial-year periods.

4. Target audience personas

Four separate personas cover students, graduates, businesses and potential service customers.

Priya - The First-Internship Student	
Segment	Student
Profile	20, 2nd-year B.Tech (CSE), Tier-2 city college, limited budget, studies on her phone.
Goals	Get her first internship and certificate before 3rd year; build 2-3 projects for her resume.
Pain points	Doesn't know which track to choose; worried about fake/paid internships; no one to review her code.
Channels	Instagram reels, YouTube Shorts, college WhatsApp groups, LinkedIn (new user).
Key message	Free, virtual, beginner-friendly Level 1 tasks with mentor review and a verifiable certificate.
Primary CTA	Apply free -> choose your track

Arjun - The Job-Ready Fresher	
Segment	Graduate
Profile	23, BCA/MCA graduate, applying to entry-level developer/analyst jobs, active on LinkedIn.
Goals	Show recruiters real, working projects and an LOR; move from 'certificates' to 'portfolio'.
Pain points	Gets rejected for 'no experience'; certificates without projects are ignored.
Channels	LinkedIn, Google search, Naukri/Indeed, Telegram job groups.
Key message	Level 2-3 tasks produce portfolio projects; performance-based LOR; certificates prove output.
Primary CTA	Start at Level 2 -> build your proof

Ramesh - The Local Business Owner	
Segment	Business
Profile	42, runs a coaching centre/retail shop; uses WhatsApp and Facebook daily; no website.
Goals	More local enquiries; look professional online; appear on Google Maps.
Pain points	Thinks websites are expensive and complicated; burned by an unreliable freelancer before.
Channels	Facebook, Instagram, Google Search/Maps, WhatsApp.
Key message	Simple, affordable website + digital marketing from a registered company, explained in plain language.
Primary CTA	Get a free website health check

Sneha - The Startup / SME Decision-Maker	
Segment	Service customer
Profile	31, operations head at a growing startup; needs an app, cloud setup or data dashboard.
Goals	Reliable delivery, clear scope and timeline, reasonable cost.
Pain points	Large agencies are costly; small vendors miss deadlines; hard to judge technical quality.
Channels	LinkedIn, Google Search, referrals.
Key message	One team for web, app, cloud and data work, with a transparent process.
Primary CTA	Request a quote -> share your requirement

5. Service-wise audience mapping

Each offering is matched to the audience that needs it, the channel that reaches them, the content that persuades them, the CTA and the KPI that measures success.

Offering	Audience	Core need	Channel	Content	CTA	KPI
Virtual Internships (all tracks)	Students, graduates	First internship, verifiable certificate, projects	Instagram, LinkedIn, WhatsApp groups	Track explainers, intern showcases, fake-internship red flags	Apply free	Applications, apply-page visits
Level-wise IT Training (L1-L3)	Students needing structure; freshers	A guided path from basics to portfolio	LinkedIn carousels, YouTube Shorts	Level 1->3 roadmaps, mentor-feedback examples	Choose your level	Roadmap saves, track-page visits
Certification & LOR	Graduates, TPOs, parents	Proof that is credible to recruiters	LinkedIn, website	How to verify a certificate, LOR stories	Verify a certificate	Verification-page visits
Web Development (service)	Local businesses, startups	Affordable, professional website	Facebook, Google Business Profile, LinkedIn	Website checklists, before/after mockups, process posts	Free website health check	Audit requests, enquiries
App Development (service)	Startups, SMEs	MVP or business app	LinkedIn, Google Search	'App or website?' guides, process breakdowns	Request a quote	Quote requests
Cloud Computing (service)	SMEs, startups	Hosting, deployment, cost control	LinkedIn	Cloud basics explained, cost-saving tips	Book a consultation	Consultation requests
Data Science / Analytics (service)	SMEs	Dashboards, reports, insights from data	LinkedIn	Sample dashboard posts, 'what your data can tell you'	Request a quote	Enquiries
Digital Marketing (service)	Local businesses	Visibility, leads, social presence	Facebook, Instagram	Local SEO tips, Google Business Profile guides	Free website health check	Audit requests, enquiries

6. Competitor analysis & SWOT

Competitor	Type	Positioning	Strengths	Gaps	Veda opportunity
Internshala	Internship marketplace + paid trainings	Large listing platform connecting students with many employers	Very high brand awareness, huge listing volume, strong SEO	Not a single guided program; quality varies by employer	Position Veda as a structured, mentor-reviewed program rather than a listing
Free virtual-internship brands (e.g. CodSoft, Oasis Infobyte, CodeAlpha)	Task-based virtual internships	Free/low-cost task lists with certificates, heavily shared on LinkedIn	Strong LinkedIn word-of-mouth from intern posts	Often seen as 'certificate mills'; limited feedback on tasks	Lead with mentor review, Level 1-3 depth, verification ID and LOR
Ed-tech course platforms (paid bootcamps)	Paid courses with internships	Premium, placement-focused courses	Big ad budgets, polished content, placement claims	Expensive; out of reach for many Tier-2/3 students	Free-to-apply message; 'proof of work' at zero cost
Local web agencies & freelancers	Website/marketing services	Low-cost local website and social media packages	Personal relationships, local presence	Inconsistent quality and support; little process transparency	Registered company, clear process, combined web + marketing offering

Competitor observations are based on publicly visible positioning and general market perception, not internal data. They should be re-checked before being used in published content.

SWOT analysis

Strengths	Weaknesses
• Free to apply, 100% virtual • Level 1-3 structure for all skill levels • Mentor review, dashboard, verification ID, LOR • Internships + client services under one brand • MSME/Udyam registered	• Low brand awareness vs. large platforms • Limited visible social proof on the website • Few published client case studies
Opportunities	**Threats**
• Intern LinkedIn posts as a free advocacy engine • SEO for long-tail 'free internship + track' searches • Local SEO for small-business services • Campus ambassador / TPO partnerships	• Distrust of 'free internship' offers in general • Well-funded competitors dominating ads and search • Algorithm changes reducing organic reach

7. Keyword research

Keywords are grouped into clusters by search intent. Transactional keywords target the Apply and track pages, informational keywords feed the blog, and commercial keywords target service pages and the Google Business Profile.

Keyword	Cluster	Intent	Demand	Competition	Target page
free virtual internship for students	Internships	Transactional	High	High	Home / Apply
online internship with certificate	Internships	Transactional	High	High	Apply
internship for btech students 2026	Internships	Transactional	High	Medium	Internships
web development internship for freshers	Track pages	Transactional	Medium	Medium	/internships/web-development
data science internship for students	Track pages	Transactional	Medium	Medium	/internships/data-science
python internship online free	Track pages	Transactional	Medium	Medium	/internships/python
cloud computing internship for students	Track pages	Transactional	Medium	Low	/internships/cloud
android development internship online	Track pages	Transactional	Low	Low	/internships/android
ui ux design internship for beginners	Track pages	Transactional	Low	Low	/internships/ui-ux
java internship for students	Track pages	Transactional	Low	Low	/internships/java
data analytics internship for freshers	Track pages	Transactional	Medium	Medium	/internships/data-analytics
how to verify internship certificate	Trust	Informational	Medium	Low	Certificate verification + blog
fake internship red flags	Trust	Informational	Low	Low	Blog
is virtual internship worth it	Career guidance	Informational	Medium	Low	Blog
projects for resume for freshers	Career guidance	Informational	High	Medium	Blog + lead magnet
how to get internship in first year btech	Career guidance	Informational	Medium	Low	Blog
website development for small business	Services	Commercial	Medium	High	/services/web-development
affordable website design india	Services	Commercial	Medium	High	/services/web-development
app development services for startups	Services	Commercial	Medium	High	/services/app-development
digital marketing services for small business	Services	Commercial	Medium	High	/services/digital-marketing
cloud deployment services for small business	Services	Commercial	Low	Medium	/services/cloud
website developer in bihar	Local	Commercial	Low	Low	Services + Google Business Profile
digital marketing agency lakhisarai	Local	Commercial	Low	Low	Google Business Profile

Relative demand and competition are planning estimates from search patterns and Google Trends-style comparison, not measured volumes. Validate with Google Keyword Planner, Google Trends and Search Console before final prioritisation.

Priority: start with low-competition long-tail keywords (track + 'internship for students', verification and career-guidance queries) where a small site can rank within weeks, then build toward the broader head terms.

8. SEO content opportunities

Opportunity	What to create	Target keywords	Priority
Dedicated landing page per internship track	Each track (Web Dev, Data Science, Python, Cloud...) gets its own page with level-wise tasks, sample projects, FAQs and an Apply button.	track + 'internship' keywords	High
Certificate verification page (indexable)	A clear public page explaining how employers verify a certificate ID; builds trust and ranks for verification queries.	how to verify internship certificate	High
Blog: How to spot a fake internship	Value-first trust article; positions Veda as transparent; internal link to Apply.	fake internship red flags	High
Blog: 10 resume projects for freshers	Pairs with the free 'Fresher Project Kit' lead magnet.	projects for resume for freshers	High
Blog: Is a virtual internship worth it?	Honest pros/cons article; captures doubtful searchers.	is virtual internship worth it	Medium
Service pages per service	Separate pages for Web, App, Cloud, Data and Digital Marketing with process, FAQs and an enquiry form.	service + 'for small business/startups'	High
Google Business Profile + local SEO	Claim/optimise the profile with services, photos and posts; collect reviews.	local service keywords	Medium
FAQ and Organization schema	Add FAQPage and Organization structured data to existing FAQ and contact sections.	rich results	Medium

9. Social media strategy

Objective: build trust and reach with value-first content, then convert attention into applications and enquiries. About 80% of posts teach or prove; about 20% promote.

Content pillars

Pillar	Share	What it covers	Purpose
Learn	27%	Bite-sized tutorials, roadmaps, tool tips per track	Value / saves
Proof	23%	Intern project showcases, mentor feedback, spotlights	Trust / social proof
Career	20%	Resume, LinkedIn, interview and internship-safety guidance	Value / shares
Business	17%	Website, app, cloud and marketing tips for business owners	Service leads
Brand	13%	Batch announcements, milestones, behind the scenes	Applications

Platform roles

Platform	Role	Main audience	Frequency	Formats
LinkedIn	Credibility hub	Graduates, TPOs, startups/SMEs	4-5 posts/week	Carousels, text+image, polls, intern spotlights, articles
Instagram	Student reach & discovery	Students (18-22)	5 posts/week + daily stories	Reels, carousels, stories, highlights
Facebook	Local business reach	Small business owners	3 posts/week	Tip posts, checklists, local group sharing
WhatsApp / Telegram (optional)	Retention & announcements	Applicants, interns, campus groups	2 updates/week	Batch dates, new tracks, webinar reminders

Brand & tone

- Visuals: Veda navy (#0B1E4D) backgrounds, orange (#F97316) for highlights and CTAs, white text; one Canva template per format.
- Voice: friendly mentor - clear, honest, encouraging; no hype, no fake urgency, no unverifiable numbers.
- Always show real work: screenshots of intern projects (with permission) beat stock images.

10. LinkedIn content plan

Goal: Build Veda Technology into the most trusted name for free, project-based virtual internships and a credible small-business IT partner.

Cadence: 4-5 posts per week on the Company Page (Mon-Fri, 9-11 AM or 6-8 PM IST); founder/mentors reshare with a personal comment.

Content mix

Format	Share
PDF carousels (roadmaps, checklists)	35%
Intern spotlights & project showcases	25%
Text + image insight posts	20%
Polls & questions	10%
Service / process posts	10%

Tactics

- Intern advocacy: every intern already shares task posts on LinkedIn - give them a template, ask them to tag the Company Page and use #VedaTechnologyIntern and #BuildYourProof.
- Weekly 'Intern Spotlight' that reshares the best intern post with mentor comments.
- Optimise the Company Page: navy/orange banner, tagline 'Internships that prove output', About section with tracks and services, Apply button.
- Reply to every comment within 24 hours; use comment keywords (e.g. 'ROADMAP') to start DM conversations.
- Hashtags (3-5 per post): #VedaTechnology #BuildYourProof #VirtualInternship #Internship2026 + track tag (#WebDevelopment, #DataScience...).

Intern post template (shared with all interns)

"*Day [X] of my [Track] internship at @Veda Technology - this week I built [project] using [tools]. The biggest thing I learned: [one insight]. Mentor feedback helped me [improvement]. #VedaTechnologyIntern #BuildYourProof #[Track]*"

11. Instagram content plan

Goal: Reach students early, make Veda Technology memorable, and drive link-in-bio clicks to the Apply page.

Cadence: 5 feed posts per week (3 Reels + 2 carousels), 3-5 stories daily; best times 12-2 PM and 7-10 PM IST.

Content mix

Format	Share
Reels (tips, myths, 'day in the life')	60%
Carousels (roadmaps, comparisons)	40%

Tactics

- Bio: 'Free virtual internships + IT services | Level 1-3 | Verified certificates' with a link page (Apply, Tracks, Free Kit, Services).
- Story highlights: Apply, Tracks, Certificates, Reviews, Services, FAQ.

- Navy backgrounds with orange highlight text and one consistent Canva template per format.
- Hook in the first 2 seconds; captions with one CTA; on-screen text for silent viewing.
- Weekly story Q&A; and polls; collaborate with student creators/campus ambassadors on reels.

Sample Reel script - '5 red flags of a fake internship'

0-2s hook: 'Paid ₹2,000 for an internship? Watch this.' **2-20s:** 5 quick red flags on navy cards (registration fee, no tasks, no mentor, no verification ID, certificate in 1 day). **20-27s:** 'A real internship has tasks, reviews and a verifiable certificate.' **End card:** 'Save this. Share it with your batch.'

12. 30-day content calendar

Suggested start: Monday, 16 November 2026. The full editable version (with dates) is in the campaign workbook.

Day	Platform	Pillar	Format	Topic / hook	Audience	CTA
1	LinkedIn	Brand	Text + image	Campaign launch: 'Most internship certificates prove attendance. Ours prove output.'	Students & graduates	Apply free
2	Instagram	Career	Reel	5 red flags of a fake internship (and what a real one looks like)	Students	Save & share
3	LinkedIn	Learn	PDF carousel	Web Development roadmap: Level 1 -> Level 3 tasks	Students & graduates	Comment 'ROADMAP'
4	Instagram	Learn	Carousel	Which internship track fits you? A 6-question quiz	Students	Link in bio
5	Facebook	Business	Image post	Does your business need a website in 2026? 3 honest reasons	Small businesses	Free website health check
6	Instagram	Proof	Reel	Intern project showcase #1 - what a Level 1 intern built	Students	Apply free
7	Instagram	Career	Stories	Ask-me-anything: internships, certificates, levels	Students	Reply to story
8	LinkedIn	Proof	Text + image	How employers verify a Veda Technology certificate ID	Graduates, TPOs	Verify a certificate
9	Instagram	Learn	Reel	Python in 60 seconds: your first automation script	Students	Follow for Part 2
10	LinkedIn	Proof	Intern spotlight	Intern Spotlight #1 + mentor feedback	Students & graduates	Use #VedaTechnologyIntern
11	Instagram	Career	Carousel	10 resume projects for freshers	Students & graduates	Get the free Fresher Project Kit
12	LinkedIn	Business	PDF carousel	Small-business website checklist: 10 must-haves	SMEs, business owners	Free website health check
13	Instagram	Proof	Reel	A day in the life of a virtual intern	Students	Apply free
14	Facebook	Business	Image post	Set up your Google Business Profile in 15 minutes	Small businesses	Message us for help
15	LinkedIn	Career	Poll	What's the biggest barrier to your first internship?	Students & graduates	Vote & comment
16	Instagram	Learn	Carousel	Data Science vs Data Analytics - which track should you pick?	Students	Link in bio
17	LinkedIn	Business	Text + image	How we build a business website: our 5-step process	SMEs, startups	Request a quote
18	Instagram	Learn	Reel	UI/UX: fixing a bad login screen in 30 seconds	Students	Save
19	LinkedIn	Career	PDF carousel	How to write your internship LinkedIn post (template inside)	Interns & students	Tag @Veda Technology
20	Instagram	Proof	Reel	Intern project showcase #2 - Level 2 build	Students	Apply free
21	Instagram	Proof	Stories	Weekly recap + FAQ highlight update	Students	Swipe to FAQ
22	LinkedIn	Learn	PDF carousel	Cloud computing basics: 6 terms every beginner should know	Students & graduates	Comment 'CLOUD'
23	Instagram	Brand	Carousel	From Level 1 to LOR: how the program works	Students	Apply free

Day	Platform	Pillar	Format	Topic / hook	Audience	CTA
24	Facebook	Business	Image post	App or website - what does your business actually need?	Small businesses	Send an enquiry
25	LinkedIn	Proof	Intern spotlight	Intern Spotlight #2 - from first commit to final project	Students & graduates	Apply free
26	Instagram	Learn	Reel	3 Canva mistakes beginner designers make	Students	Save & share
27	LinkedIn	Career	Article	Is a virtual internship worth it? An honest answer (also on the blog)	Graduates	Read the full blog
28	Instagram	Brand	Stories	Countdown: next batch applications	Students	Apply free
29	LinkedIn + Instagram	Learn	Live session	Free live session: 'From Zero to Internship'	Students & graduates	Register free
30	LinkedIn + Instagram	Brand	Carousel	Month recap: thank you, interns - what we built together	All audiences	Apply for next batch

13. Website content recommendations

Social media brings people to the website; the website must convert them. These recommendations are based on a review of the public homepage and apply page.

Recommendation	Details	Priority
Fix homepage counters	The stats section ('Interns Trained', 'Hiring Partners', etc.) shows '0+' when read without JavaScript. Render real, verifiable numbers in the HTML, or remove the section until numbers are ready.	High
Track landing pages	Create one page per internship track with level-wise tasks, sample projects, duration, FAQs and an Apply button.	High
Show real social proof	Add intern testimonials with name, track and a LinkedIn link, plus an embedded gallery of intern project posts.	High
Prominent certificate verification	Add a 'Verify Certificate' item in the main navigation and a short how-it-works explanation for employers.	High
Service pages with proof	Separate pages for each service with process, deliverables, FAQs, sample work and a short enquiry form.	High
About / team transparency	Add founder and mentor profiles, registration details and the office address to strengthen trust.	Medium
Blog / resources section	Publish the SEO articles from this plan; link every article to a relevant track or service page.	Medium
Conversion helpers	Sticky orange 'Apply Now' button on mobile, WhatsApp chat button, and a clear 'Request a Service' form.	Medium
Technical SEO	Unique title and meta description per page, image alt text, compressed images, FAQ/Organization schema, XML sitemap submitted in Search Console.	Medium
Tracking setup	Install Google Analytics 4 events for Apply clicks, form submits and WhatsApp clicks; use UTM links on every social post.	High

14. Lead-generation campaign

Campaign: #BuildYourProof - 30-day organic lead-generation campaign

Budget: Rs 0 paid media. Organic channels, owned website, free tools (Canva, Google Forms/Sheets, GA4 concepts, Search Console concepts).

Funnel A - Students & Graduates

Lead magnet: Free 'Fresher Project Kit' (10 resume-ready project ideas mapped to Veda tracks + a one-page resume template) and a free live session 'From Zero to Internship'.

Stage	Action
Attract	Reels, carousels and LinkedIn posts on career and safety topics; intern posts with #VedaTechnologyIntern.
Capture	Link in bio / post CTA -> Google Form (name, email, college, year, track of interest) -> kit delivered by email.
Nurture	3 follow-up emails/WhatsApp messages over 7 days: track guide -> intern showcase -> batch deadline.
Convert	Apply page with UTM tracking; applicants tagged by source in Google Sheets.
Advocate	Interns post completed tasks on LinkedIn using the template - feeding new top-of-funnel reach.

Funnel B - Small Businesses & Startups

Lead magnet: Free '10-Point Website Health Check' - a short checklist review of the business's site or Google Business Profile.

Stage	Action
Attract	Facebook/LinkedIn tip posts, local business groups, Google Business Profile posts.
Capture	Short form: business name, website (if any), service needed, phone/WhatsApp.
Nurture	Deliver the health-check summary within 48 hours with 3 clear fixes.
Convert	Offer a call and a scoped quote for Web, App, Cloud, Data or Digital Marketing work.
Advocate	Ask satisfied clients for a Google review and permission for a short case study.

Tracking

All links use UTM parameters (utm_source=instagram|linkedin|facebook, utm_medium=organic_social, utm_campaign=buildyourproof). Leads are logged in a shared Google Sheet with source, date, segment and status (New -> Contacted -> Applied/Quoted -> Converted).

15. Call-to-action strategy

Funnel stage	Students & graduates	Businesses	Placement
Awareness	Follow for daily tech tips / Save this	Follow for business growth tips	Reels, carousels, end screens
Consideration	Comment 'ROADMAP' / Take the track quiz	Download the website checklist	Carousels, polls, comment-to-DM
Lead capture	Get the free Fresher Project Kit	Get a free website health check	Link in bio, pinned posts, LinkedIn featured
Conversion	Apply free -> choose your track	Request a quote / Book a call	Website hero, sticky mobile button, DM replies
Advocacy	Share your task with #VedaTechnologyIntern	Leave a Google review	Post-completion emails, certificate page

CTA rules

- One primary CTA per post - never stack 'apply, follow, DM and share' together.

- Follow the 80/20 rule: about 80% of posts lead with value (save/share/comment) and 20% ask for an application or enquiry.
- Action verb + benefit + low friction: 'Apply free - takes 3 minutes' beats 'Click here'.
- Brand-consistent buttons: orange CTA on a navy background on website and creatives.
- Every CTA link carries UTM parameters so its performance can be measured.

16. Campaign KPI framework

KPIs follow the funnel from awareness to advocacy, using the possible KPIs named in the brief: website visits, inquiries, engagement and conversions.

Stage	KPI	How it is calculated	Tool	30-day target
Awareness	Total reach / impressions	Sum of unique accounts reached across platforms	LinkedIn & Meta Insights	40,000+ reach
Awareness	Follower growth	(New followers / starting followers) x 100	Platform insights	+15-25%
Engagement	Engagement rate	(Likes + comments + shares + saves) / reach x 100	Platform insights, Google Sheets	LinkedIn 4%+, Instagram 5%+
Engagement	Saves & shares	Count per post	Instagram/LinkedIn insights	Saves at least 3% of reach on Learn posts
Traffic	Website visits from social	Sessions with utm_medium=organic_social	Google Analytics 4 (concept)	600+ sessions
Traffic	Click-through rate (CTR)	Link clicks / reach x 100	UTM + platform insights	1.0-1.5%
SEO	Search impressions & clicks	Impressions, clicks and avg. position for target keywords	Google Search Console (concept)	Impressions +30% vs. baseline
Conversion	Internship applications	Apply-form submissions attributed by UTM	Apply form + Google Sheets	40-60
Conversion	Lead-magnet sign-ups	Google Form submissions	Google Forms/Sheets	100+
Conversion	Business enquiries / audit requests	Service form + WhatsApp enquiries	Google Sheets lead log	6-10
Advocacy	Branded intern posts	LinkedIn posts using #VedaTechnologyIntern	LinkedIn hashtag search	50+

Review rhythm: quick check every Monday, mid-campaign review on Day 15, final report on Day 30.

17. Expected performance analysis

Three scenarios are forecast from transparent assumptions. The workbook recalculates everything automatically when the assumptions change.

Assumptions

Assumption	Conservative	Realistic	Optimistic	Unit
LinkedIn posts in 30 days	16	18	20	posts
Avg. LinkedIn reach per post	500	900	1,500	accounts
Instagram feed posts in 30 days	18	20	22	posts
Avg. Instagram reach per post	600	1,100	2,000	accounts
Facebook posts in 30 days	10	12	12	posts
Avg. Facebook reach per post	200	350	600	accounts
Engagement rate (blended)	3%	4.5%	6%	of reach
Link click-through rate	0.8%	1.2%	1.6%	of reach
Organic search visits (month 1)	80	150	250	sessions
Student share of website visits	85%	85%	85%	of visits
Application rate (student visits)	6%	8%	10%	of student visits
Lead-magnet sign-up rate (student visits)	15%	20%	25%	of student visits
Enquiry rate (business visits)	4%	6%	8%	of business visits

Forecast results (30 days)

Metric	Conservative	Realistic	Optimistic
Total social reach	20,800	42,400	81,200
Total engagements	624	1,908	4,872
Website visits from social	166	509	1,299
Total website visits (social + search)	246	659	1,549
Internship applications	13	45	132
Lead-magnet sign-ups	31	112	329
Business enquiries	1	6	19

These are planning estimates for a small, growing brand using organic reach only (no paid ads). Replace them with real numbers from platform insights after week 1 and re-forecast.

Interpretation

- Instagram is expected to deliver the most reach; LinkedIn is expected to deliver the highest-quality traffic and most applications.
- Business enquiries are a small number in month 1 but are the highest-value leads; local SEO and Google Business Profile compound over months 2-3.
- The biggest lever is intern advocacy - if 50+ interns post with the campaign hashtag, LinkedIn reach can move toward the optimistic scenario.

18. Implementation timeline

Phase	Key activities
Week 0 (setup)	Optimise LinkedIn/Instagram/Facebook profiles, create Canva templates, set up UTM links, Google Forms and the lead sheet, fix website counters.
Week 1	Launch #BuildYourProof, publish trust content, release intern post template, start daily stories.
Week 2	Release the Fresher Project Kit, start the business website health-check offer, first Intern Spotlight.
Week 3	Publish SEO blogs and track pages, run polls, second Intern Spotlight, mid-campaign KPI review.
Week 4	Live session 'From Zero to Internship', batch-deadline push, month recap and final KPI report.

19. Conclusion

Veda Technology already has the ingredients of a strong brand: a free and structured internship model, mentor review, verifiable certificates and real client services. What it needs is visibility and proof. The #BuildYourProof campaign combines SEO, LinkedIn, Instagram, Facebook, content marketing and organic lead generation so that each channel feeds the next: content builds trust, trust drives website visits, the website converts visits into applications and enquiries, and every new intern's LinkedIn post restarts the cycle - all without paid advertising.
